

Manager's Report: April 2023

- Fuel Sales for March 2023: 2128 Gallons Down 60% from last year
- System for Award Management (SAM) Submitted 4/5.
- Hazardous Waste Barrel Replaced to bring us back into compliance 4/7
- California Environmental Reporting System (CERS) Annual Documents Updated 4/12
- EDC Environmental Management Department needs a home for a 500 Gallon Used Oil Tank. Owned by the county and would take care of maintenance. We would be able to use Tank.
- SB 720 Bill awareness from Sacramento: each public or private airport shall report to the division and the State Air Resources Board the regulations, incentives, or other measures the airport is deploying or facilitating to achieve net zero greenhouse gas emissions, in accordance with applicable greenhouse gas regulations or protocols, for all emissions, including scope 1, scope 2, and scope 3 emissions, from its operations.

(b) As part of an update to its general plan or sustainability plan, or if no plan exists, on or before June 1, 2024, each public or private airport that has a high volume of private flights with low passenger capacity in a disadvantaged community, as defined in Section 39711 of the Health and Safety Code, shall report to the division and to the relevant air quality management district on its efforts to mitigate environmental justice, air quality, and other impacts on neighboring communities.
